

LOOKING YOUNG BEGINS WITH FEELING YOUNG

Wellmune® strengthens immune function as part of overall plan for healthy aging

Quick Facts About Wellmune®:

Research. Wellmune's® year-round protection is the culmination of more than \$300 million research that includes nine human clinical studies.

Certifications. Wellmune® has broad regulatory approval, including the U.S. (GRAS/FDA), EU, China and other countries around the world. This unique food, beverage and supplement ingredient is Kosher, Halal, non-allergenic and GMO-free.

Applications. Ideal for formulation in virtually all foods, beverages and dietary supplement product forms.

Patents. More than 40 U.S. patents and patents pending, plus additional filings in more than 20 countries.

The immune system weakens with age. The body produces fewer immune cells, communication between cells breaks down and responses to health challenges diminishes. The slow decline of immune function can significantly impact overall health, vitality and appearance.

Wellmune®, a natural food, beverage and supplement ingredient from Kerry Group, has been shown in multiple clinical trials to strengthen the immune system. Wellmune® primes billions of immune cells that help keep the body healthy. Wellmune® activated immune cells are ready to respond more quickly when challenged. A compelling body of human clinical research supports Wellmune® as a safe and effective ingredient and represents an excellent choice for healthy aging products.

WELLMUNE® STRENGTHENS THE IMMUNE SYSTEM FOR HEALTHY AGING

- **Wellmune® reduces upper respiratory tract infection (URTI) symptoms.** Clinical studies in high-stress populations, including marathoners, firefighters, medical students and ordinary people with high-stress lifestyles, demonstrate that Wellmune® consistently reduced the incidence of URTI symptoms.
In a 12-week study of 122 healthy volunteers (32 men, 90 women 38 + 12yrs), participants taking 250 mg of Wellmune® daily reported a 58% reduction in URTI symptoms, compared with individuals taking a placebo. The study results were statistically significant ($p < 0.05$).

Effects of Wellmune® on URTI Symptoms in Moderately Stressed Subjects

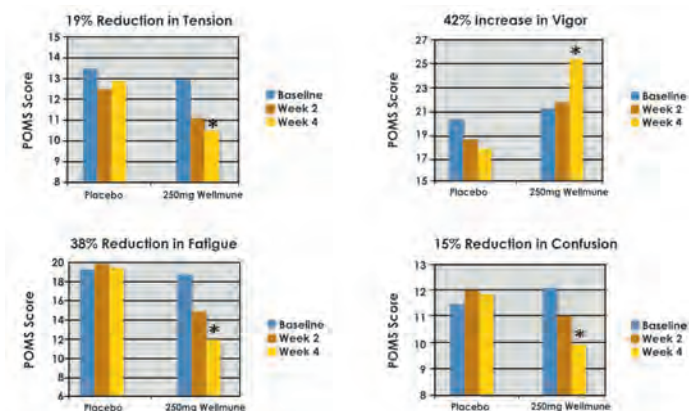

* $p < 0.05$ vs. placebo

"Beta-glucan Supplement Reduces Upper Respiratory Tract Infections and Improves Mood State in Healthy Stressed Subjects." FASEB J. 24:922.11 Manuscript accepted for 2012 publication by Journal of American College of Nutrition.

- **Wellmune® improves overall health and sense of well-being.** Perhaps not surprisingly, people who are healthy feel good both physically and psychologically. In multiple clinical studies, participants taking Wellmune® not only had fewer URTI symptoms, but they also reported better overall health and improvements in several key psychological measures.
A randomized, double-blinded and placebo-controlled clinical study with 150 individuals with stressful lifestyles demonstrated that after four weeks participants taking 250 mg of Wellmune® daily experienced statistically significant increases in vigor (42%) and reductions in fatigue (38%), tension (19%) and stress-related confusion (15%).

Effects of Wellmune® on Psychological Wellbeing in Moderately Stressed Subjects

"Beta 1,3/1,6 Glucan Decreases Upper Respiratory Tract Infection Symptoms and Improves Psychological Well-being in Moderate to Highly-Stressed Subjects." Agro Food Industry Hi-Tech (2010). 21:21-24.
